

## Application Design

### Requirements

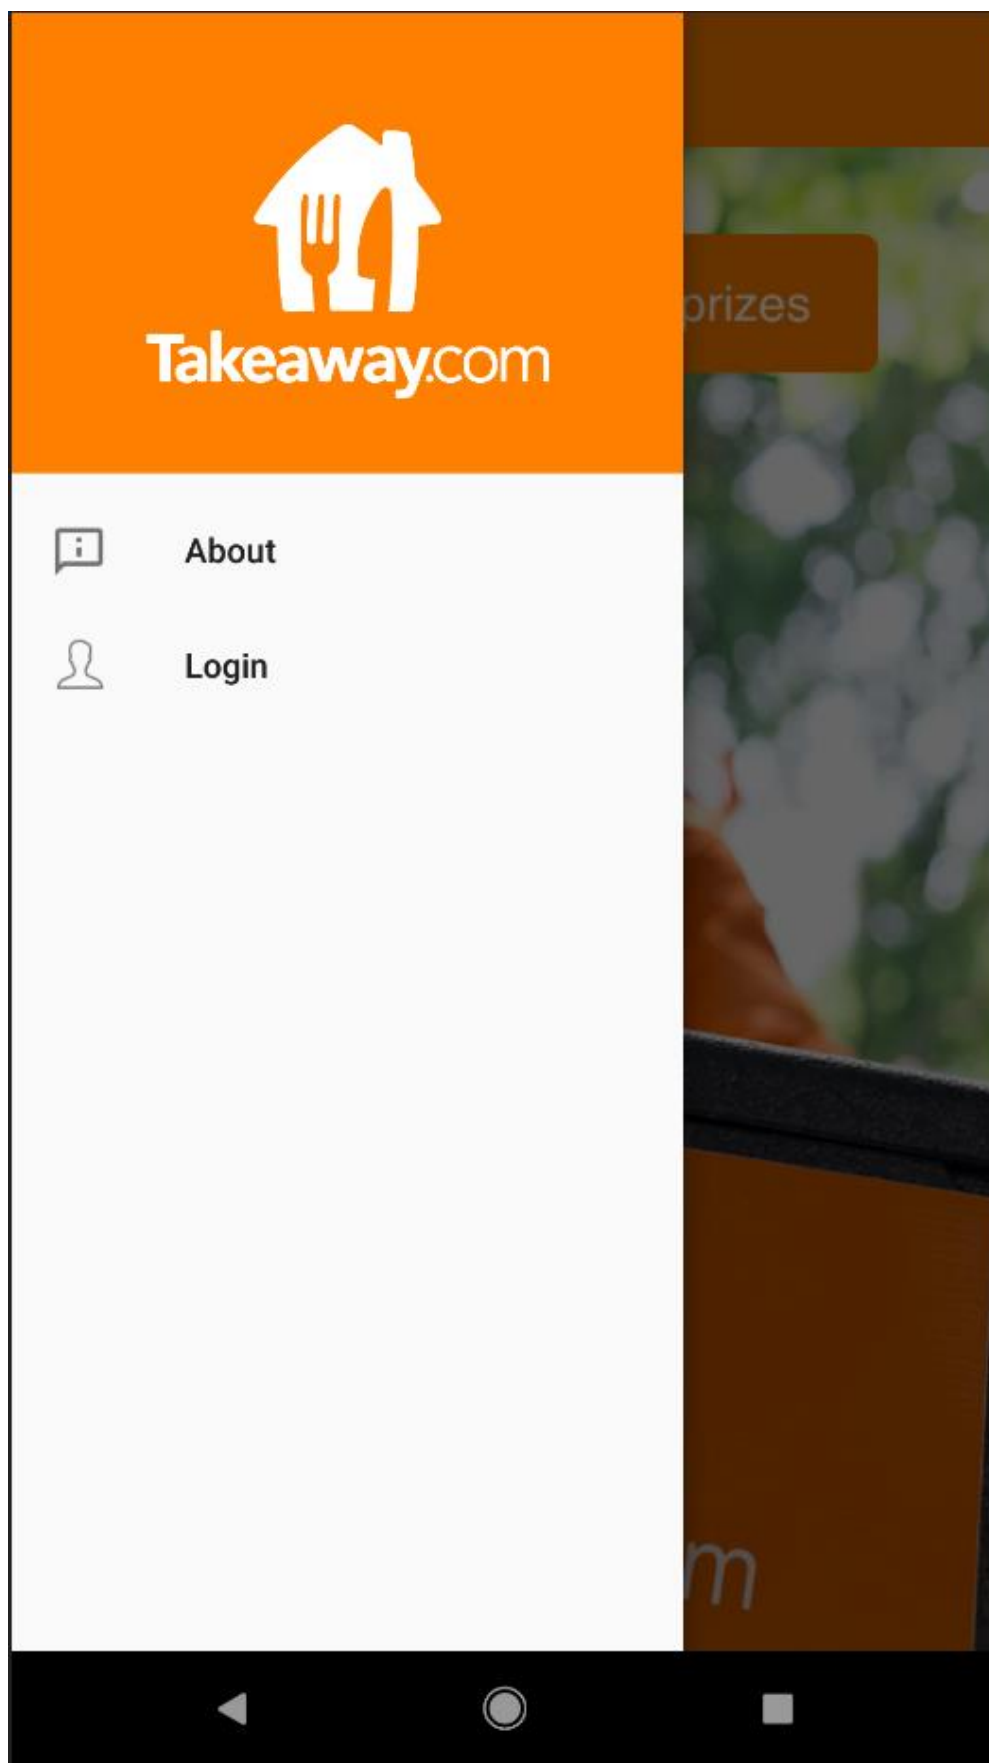

- Potential candidate must be able to fill in their contact details
- Potential candidate should be able to submit answer to the code challenge
- Potential candidate must be able to watch video about Takeaway.com
- The application must ask the user for permission to store their contact details
- Manager should have an administration login for managing the app data base
- The app must be Takeaway.com branded
- The app must be usable on multiple devices
- Admin should be able to choose a winner from a list of users who answered correctly

### Resources Used

- **Google Drive** to save and share documents
- **Messenger** is used to communicate within the group.
- **GitLab** for our backlog for this project.
- **Excel** to keep track of the time for our timesheet.
- **YouTube** and **Google** for research purposes.
- **GitLab** will be used to share our code with each other.
- **Firebase** will be used for cloud server storage of application.
