

Sprint Retrospective

After the sprint 1 retrospective, our team came to these conclusions:

- Application design should be adjusted based on the feedbacks given
- Need to implement a cloud database server for multiple device usage purpose
- Must fix the code challenge part of the app
- Documentations need to be more precise
- Must prepare more for next presentation/ delivery
- Appearance of app needs a lot of reworking
- We made the mistake of focusing too much on the code challenge while the client's requirements are about collecting user data
- Need to keep track of time sheet better

After sprint 2 retrospective, our team came to these conclusions:

- Need to work on the tablet layout for the app
- Need to implement the function of picking winner
- The contact information page needs recoloring or background change
- Video maybe should be placed somewhere more visible to the users
- Presentation could have been better
- We have improved our work efficiency since last sprint
- Local storage of application need some fixing
